

# ASCE NATIONAL CONCRETE CANOE FACEBOOK PAGE

<https://www.facebook.com/ASCENCCC>

The CNCCC maintains a Facebook Page to post relevant information including Request for Information (RFI) responses.

Teams are responsible for all information provided in the Rules & Regulations, the questions and answers posted to this Facebook Page, from the date of the release of the information.

## Format for Requests for Information (RFI) Submissions

- Submitted RFI via e-mail to [cnccc@asce.org](mailto:cnccc@asce.org)
- RFIs submitted (posted) to the page will not be answered
- Indicate the section(s) being referenced in the “Subject” of the e-mail (for example, “Section 3.3.2, Aggregate Proportioning”)
- Be specific when providing the questions.
- If questions pertain to materials or products (such as the legality of admixtures), provide relevant data (such as technical data sheets) for CNCCC review.
- All RFIs submitted to the CNCCC will be made public via the Facebook Page

It is highly recommended that teams review the Facebook Page on a consistent basis (weekly) to remain current with the RFIs and their responses, general announcements, etc. Prior to submitting an RFI, teams should check the page to see if a similar RFI had already been posted to avoid redundancy.
